

\$BITARD / No Longer Replaceable

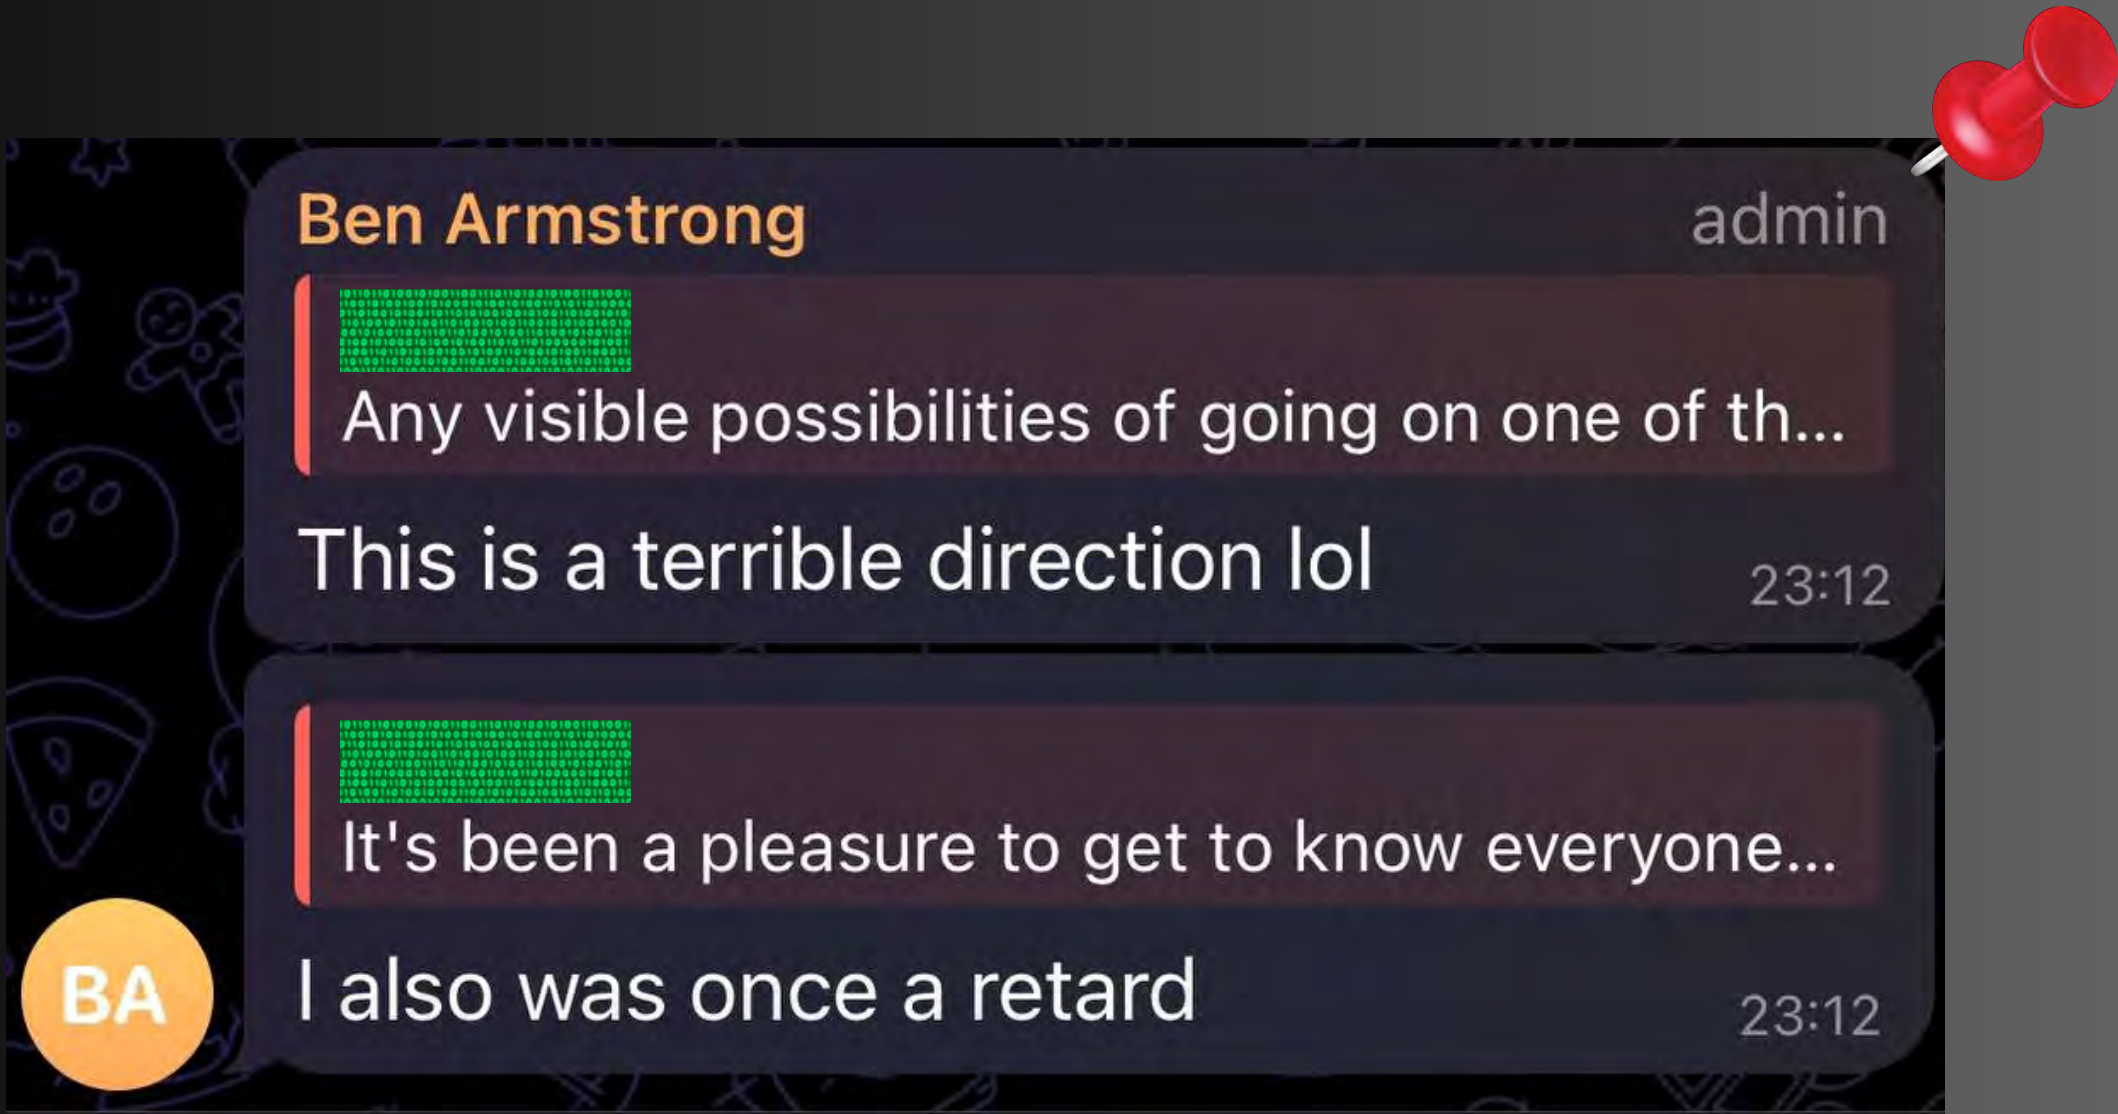

WER MEY LAMBO?

BITpaper

# WEY I STARTD

"Any one person outside myself, Cracksie, Dan or Alysse is replaceable."

"The reason we are down is because we were waiting to strategically market."

"Its none of your business! If you don't like it, then leave!"

"That's unbelievably stupid, and I hope all of you that have this entitled attitude go, TODAY!"

"Take your money somewhere else!"

You started this! We the people, tired of your self indulgence and selfish ways, have formed an unbreakable alliance and taken our money elsewhere.

YOU CALLED US A RETARD!  
WE MADE YOU A \$BITARD!

# Mey Storyzz

In the vibrant world of cryptocurrency, there lived a man named Bitard. Bitard was a charismatic figure, known for his daring ventures, larger-than-life persona and a man who appeared to hold family values above all. But behind the flashy exterior lay a troubled soul, consumed by his own vices.

Bitard had a wife and children who loved him dearly, but he couldn't resist the allure of his side chick, Cracksie. Ignoring his family's pleas, he left them behind in pursuit of fleeting pleasures with Cracksie, who fed his addiction to drugs. Driven by his insatiable desire for fame and fortune, Bitard seized an opportunity to take over a meme coin called \$Ben, a shady handshake was done. With his notoriety and charm, he hyped up the coin, promising astronomical returns and a market cap of 35 billion dollars.

However, behind the scenes, Bitard's actions were far from noble. He manipulated the market, targeted whale and retail holders alike, and abused investors, leaving a trail of broken dreams and shattered investments in his wake. No one was safe.

As Bitard's empire crumbled around him, his downfall accelerated. Kerlus, another victim of Bitard, played a crucial role in exposing Cracksie in the truck by deploying the POPO. That tragic livestream will forever be a part of Bitard's legacy, highlighted by the iconic run from Kerlus's door. P.S. Bitard sheeted his pants that night (ask Cracksie). All the while, Bitard's associate PJ, realising the true nature and intentions of Bitard, pushed him out of his own company with the support of many, leaving him with nothing but regret and resentment.

Now destitute and alone, Bitard found himself living in a cardboard box on the cold streets, with only Cracksie by his side. Together, they begged for ETH, clinging to the last shreds of their former extravagance. Bitard, adorned in a tattered Gukki jacket and a Rowleks watch, was a mere shadow of his former self, a cautionary tale of greed and hubris in the unforgiving world of cryptocurrency.

# Mey Mizzon

After realising the error of his ways, Bitard decided to sell his Rowleks and Gukki jacket to start a project which would unite those communities that have been so wrongfully advised by false profets and fake Supreme Leaders. We are creating a movement that will shake the pillars of the crypto verse once and for all. A new era of meme is born.

Ben was our motivation from which \$Bitard was born, and if he and others are given free rein to continue with his actions, the consequences will be increasingly destructive upon the crypto community. We shall not let that happen! Through epic content, an organised team and a wealth of web3 contacts, we the \$Bitard founders will cement \$Bitard into the Meme hall of fame, creating a thriving Bitardian Empire.

With great wealth comes great responsibility and that is something we understand. We are working diligently on a myriad of developments that will not only give back to those affected but also create a utilised demand for \$Bitard with a suite of defi opportunities and engaging staking protocols.

In the end, it is our responsibility to help harbour adoption, bring down those pillars of deceit and turn \$Bitard into the project that we all want to see succeed.

# KOMMUNITAY

We know the meme landscape has changed over the years and that is why we are focussing on generating an abundance of viral meme content with the addition of our telegram "BitBots".

- BITjokes
- BITsniper
- BITai
- BITranslator
- BITsafety
- BITnews

We have also created dedicated channels for community members to actively take their \$Bitard participation to the next level. We are lining up key community X spaces & TG VCs with some of the biggest names in the game, to fully send this into orbit.

With huge giveaways, quests and competitions to participate in, we are steadily building the most engaged community in the entire cryptoverse. We are \$Bitardians!

# UTILITZZZZ 1

We are working on being a viral meme with a mission and we understand that comes with responsibility to create a project that has both longevity and sustainability.

# Games

In our development pipeline, we're excited to unveil several games featuring our beloved brand ambassador, Bitard, at their core. Each game is meticulously crafted, blending innovative NFT technology and bespoke tokens tailored for the Bitard ecosystem. With distinct gameplay experiences, every title will boast its own leaderboard. At the close of each month, top-ranking players will earn coveted rewards such as NFTs, utility tokens, or exclusive merchandise. Players can leverage BITARD NFTs to enhance their characters' skills, giving them an edge as they ascend the leader board ranks

# Staking

As a \$Bitard holder you will be able to join in on the most memeable staking plans in the cryptoverse. We are currently developing a unique staking protocol with a 3 point plan. That not only brings value into the \$Bitard ecosystem but creates a self sustaining ecosystem that blends the essence of what a meme should be with fun, engaging and ultimately sustainable developments

# BITbots

These are telegram bots that both utilise and reward \$Bitard holders and actively encourage user participation and community engagement. BITbots include: BITjokes, BITnews, BITai, BITsniper, BITsafety and BITtranslator.

# UTILITZZZZ 2

## SniperBot.

In the envisioned fee structure for the Bitard Coin Sniper Bot system, revenue generation for Bitard coin holders is primarily facilitated through a unique profit-sharing mechanism. A predefined percentage of the net profits generated by the sniper bot's trading activities—let's hypothetically say 40%—is allocated to be distributed among all Bitard coin holders. This distribution is calculated based on the proportion of coins each user holds relative to the total circulating supply. For example, if a user holds 1% of all Bitard coins, they would receive 1% of the allocated 40% of trading profits. Additionally, the sniper bot charges a transaction fee, hypothetically 0.5% of each trade, which contributes to operational costs and liquidity. This fee structure not only incentivizes holding the Bitard coin as a passive income source but also aligns the interests of users and the bot's efficiency, enhancing the overall stability and value of the coin in the market.

## TardFi

When you mix Tards & Defi you get TardFi, which is going to be our liquidity enhancing and sustainable \$bitard staking development. TardFi is the umbrella name for the mission we wish to accomplish. \$Bitard will do what BA couldn't and in half the time! There will be ways for \$Bitard holders to benefit from TardFi, with \$Bitard NFT locks, passive soft staking, airdrops and loans.

\$Bitard has the memes, the community and the mission goals! Are your bags packed?

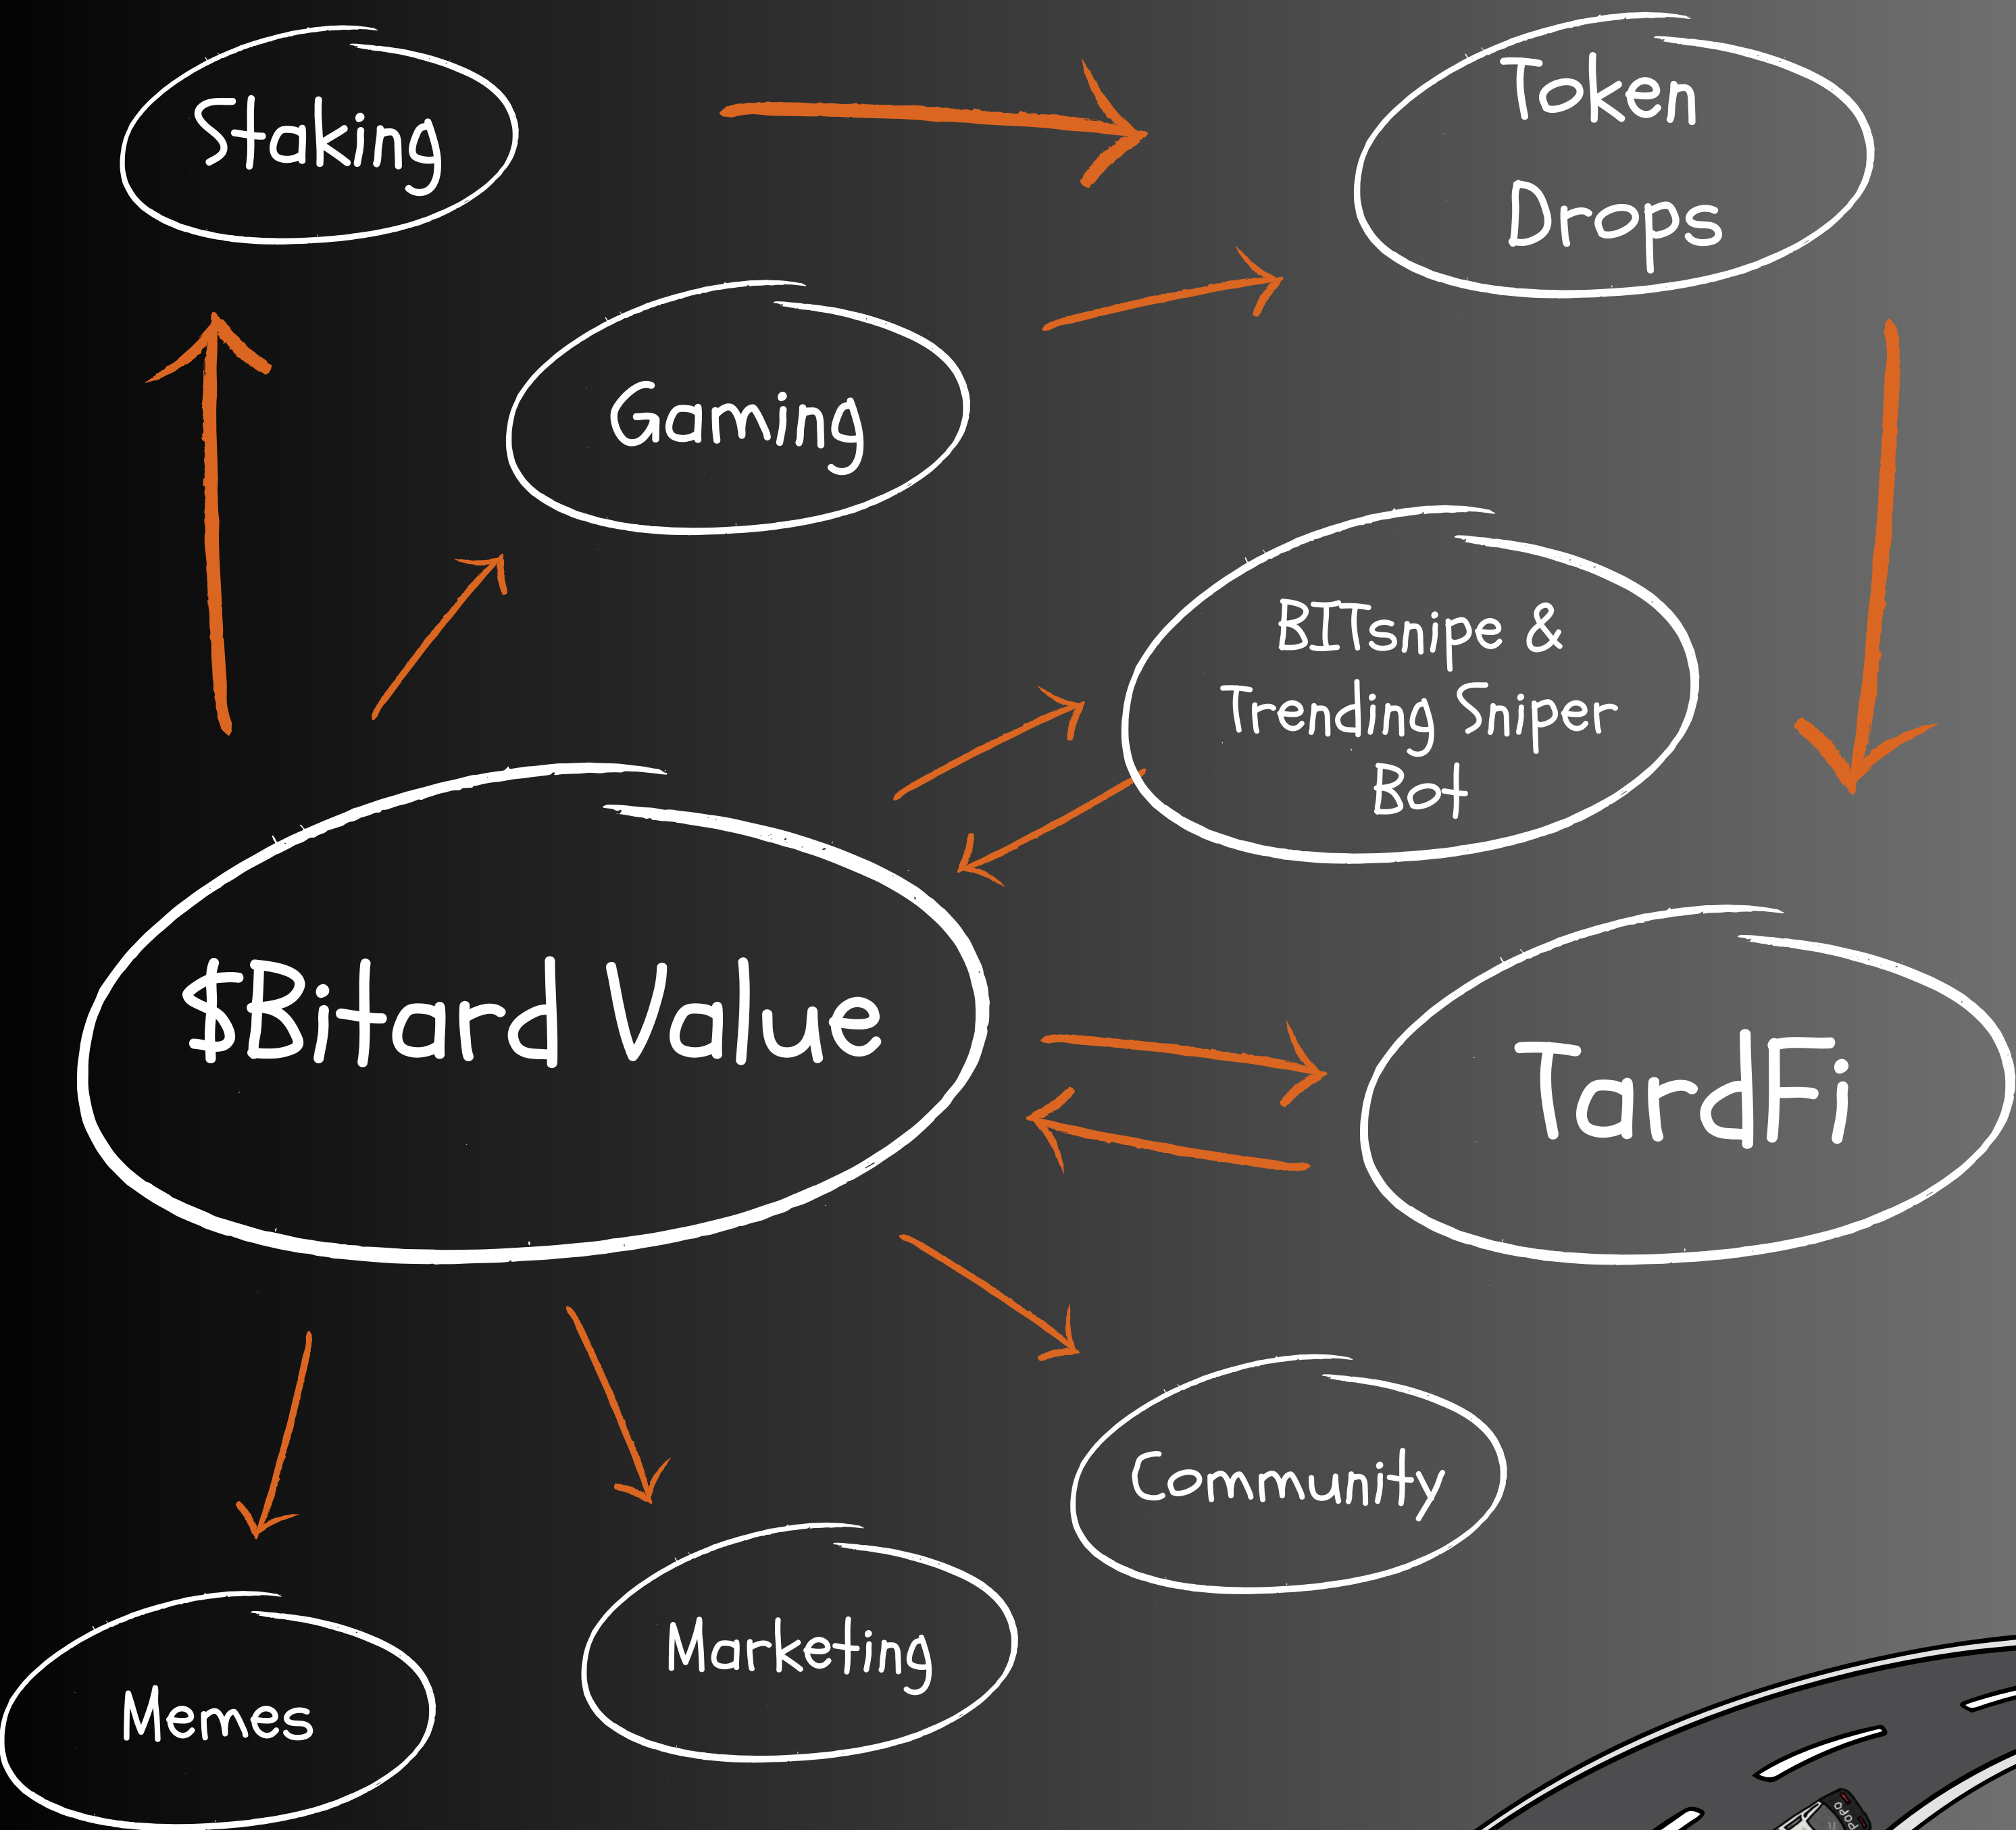

# ECUCISTEM

\$Bitard will be the leading light in the MemeFi space. With our unique blend of viral meme content, extensive web3 development team and Defi expertise. TardFi will provide both value and liquidity to \$Bitard holders and projects that come under TardFi. Items below will have their specific BITpapers, with easy to read guides, which will be released in conjunction with planned developments become functional. We are the Bitardian Guardians!

keeping community informed and engaged will be crucial.  
Helping the ecosystem flow!

Z & Community – Raiders!

Non stop raiding and bringing huge exposure to  
\$Bitard. Global brand in the making!

# FINUL FOUGHTS

So as you can see we are really pushing the \$Bitard meme with some absolutely epic content. This is not just about us trying to get one over B, we are aiming to create the next big meme token that will actually be the stalwart for the next generation.

We have all seen memes fly, they all have a narrative. Normally they are cute and furry, but this one is fat and hairy! So we have our narrative, we have our story, we have the biggest catalogue of memes and viral moments from the man that ended up being the epitome of 2023 bear market.

So with the narrative set, the memes flowing and content is on point. The next step is growth, something the team is focussed on. We all have a wealth of IRL business acumen, so connections are easily made. The funding has been secured, as you can see with the Marketing and the LP that we have locked and loaded! It is now time for some herculean growth!

\$Bitard is not just a dig at the walking horror show that is BA, its a meme on a mission. You don't have to have been hurt by BA, to be able to join. The memes are easily transferable and with our dev team we can make sure that no SHITFLUENCERS or RUGGER is free to actively participate in crypto without becoming a BITard Target! We will clean up the space, bring TardFi to the masses and turn \$Bitard into a viral meme that will transcend all others.

We also welcome messages, calls and videos from like minded crypto entrepreneurs that would like to get behind \$Bitard. We are a meme on the move and have the team to deliver our expectations. So will you become a Bitardian today?!
